PROFESSIONAL PROFILE

Eighth-semester Computer Engineering and Information Technologies student at Universidad del Valle de Guatemala. Full Stack Developer with professional experience in web development, artificial intelligence, critical process operations, API integration, and international technical collaboration. Strong analytical skills, continuous learning mindset, and a practical focus on improving systems, automating workflows, and strengthening backend, infrastructure, and data capabilities.

WORK EXPERIENCE

IT Support Engineer | Red Chapina S.A.

Apr. 2025 - Present

Guatemala City, Guatemala

- Handle real-time incidents escalated by Tier 1 support that require immediate resolution or deeper analysis for escalation to development.
- Review remittance traceability, logs, and SQL Server databases to validate transactions and identify operational issues.
- Use Postman to test external APIs and develop PHP and Python scripts to validate and reprocess operations.
- Communicate directly with technical teams from international banks to resolve issues and validate transactions.
- Collaborate with the accounting team to ensure proper reconciliation, prevent discrepancies, and reduce the operational load of first-level support.

Web Developer, Integration & Development | Bold

Nov. 2024 - Apr. 2025

Guatemala City, Guatemala

- Developed web solutions in WooCommerce and other platforms, working across frontend and backend to improve product management and user experience.
- Used Google Analytics to analyze user interaction and propose improvements that supported sales and conversion goals.
- Managed websites in GoDaddy and WordPress, implementing technical fixes, content updates, SEO improvements, SSL certificates for HTTPS, and security measures such as reCAPTCHA.
- Participated in AWS projects focused on scalability and production performance.

Junior Programmer | Recursos de Ingenieria Total S.A.

Jan. 2023 - Jul. 2023

Guatemala City, Guatemala

- Designed and developed an employee schedule control system for registering check-ins and check-outs.
- Worked on both frontend and backend components of the internal system.
- Participated in document management projects and supported internal process digitization.
